

NG TC Kit, Alvis reproduction

Price € 1500 or very near offer

Very nice and uncommon kit that probably started it's life as a NG TC. It was however build as a Alvis TC21/100 Roadster and registered as such at some point. It was dismantled again and the body sold on. Now for sale as a full body kit. What you see in the pictures is it. So no chassis, drivetrain, engine, papers etc. Find a chassis and build a unique car again! The body-tub is in fiberglass, so are the wings. The nose, bonnet and side runners are in steel however! Last picture thanks to the www, as it was once build and sold. Will fit a Van, so transport should be no problem!
